

METAL BUILDING PARTS & SALES

A Resource for Metal Building Repairs

Metal Building Parts & Sales is a one-stop supplier for metal buildings from parts to repairs to metal building packages.

Whether you need repairs, updates, additions, or yearly maintenance, our specialized knowledge of metal

buildings will help you obtain all the resources for your project.

Metal Building Repairs & Maintenance

Supplying material and labor by specialized subcontractors for repairs:

- Retrofit Roof Systems - Roof Over an old metal roof
- Repair damaged panels, walk doors, framed openings
- Interior and Exterior metal building repairs
- Reskin or Wall Over metal building wall panels
- Replace roof & wall panels, gutters, trims
- Add framed openings, walk doors, windows
- Emergency repairs or leaks
- Maintenance replacement of fasteners in roof
- Add canopies, roof curbs, equipment screens
- Demo of a building or shoring up a building in emergency
- Add insulation over purlins & girts to cover damaged insulation
- Cover skylights with panels or replace with new skylights

Metal Building Specialized Subcontractors

We work with specialized subcontractors with expertise in metal buildings. From a small repair to a large renovation project, our specialists work on all brands of metal and self-storage buildings.

Interior Insulation Before & After

Wall Panels Before & After

Before & After Repairs

Update the exterior of a metal building by replacing panels, trims & doors

Repair damaged wall panels with new panels

Add a framed opening with walk door in a metal building

Update a Metal Building Exterior

As metal building exteriors show signs of age and deterioration, update rather than rebuild.

- * **Re-Skin** - remove old panels and install new panels including trims, doors, windows, corners, base, etc. as needed
- * **Wall-Over** - to save on the labor cost install Reverse-Roll panels over existing metal panels instead of removing them
- * **Retrofit Roof System** - install a new metal roof system over an existing structurally correct metal roof with no business interruption or weather damage

Wall Panels ReSkin or Wall-over

Retrofit Roof

Replace Roof Panels

Update a Structural Building

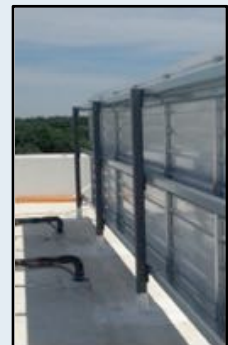

Add Dek-Strip to stop leaks between two buildings

Add Accessories

- * Customize your building with unique metal Canopies attached directly to buildings
- * Hide equipment or HVAC systems on roof with an Equipment Screen

Update a Metal Building Interior

* Low-E Class A White Insulation will give the interior a fresh new look as well as superior thermal performance while providing one of the safest exposed interior finishes on the market.

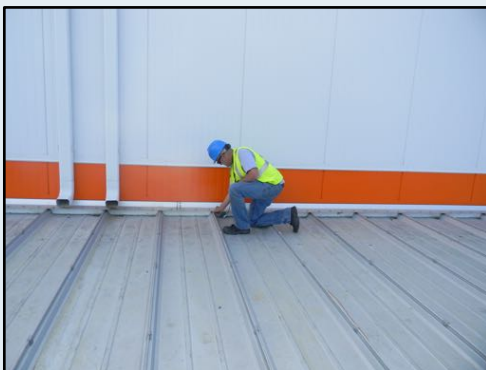

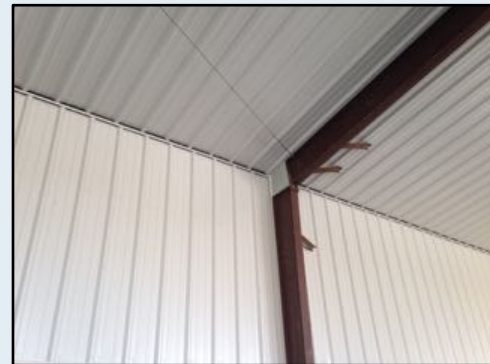

* Liner panels will provide more durability and can also be installed on walls and ceiling.

Yearly Maintenance

One of the benefits of choosing a metal building structure is the simple and effortless maintenance, but it is still important to schedule yearly maintenance to ensure all warranties stay intact. Additionally, yearly maintenance will make sure your building is visually pleasing, maintains its value, is working properly, and withstands all types of weather for years to come.
